

Surround Contrast

The diagram illustrates a neural processing model. It features a large outer circle with a grayscale gradient, labeled 'Surround Contrast'. Inside this is a smaller black ring, labeled 'Center Contrast'. A horizontal double-headed arrow connects the center of the ring to the text 'Offset'. In the top right corner, a curved double-headed arrow labeled 'OR' connects the outer edge of the large circle to the 'Offset' text. The entire diagram is set against a black background.
